VARANEO

Our Trekkingbike

Full Options: Here we offer you a fully equipped E-Bike for all applications.

Whether extended bike tours with the family, shopping or the daily way to work, with this bike you always have a reliable companion. The frame shapes differ mainly in the access area. Thus, it is up to you whether you want to get on comfortable or athletic.

engine support:
up to 25 km/h

Lithium ion battery
520 Wh Samsung

engine power:
250 W

Your E-Bike has a shapely mudguard with water deflectors in front and in the back so you stay protected against splash water event in bad weather! The high-quality aluminum frame designed in pearly metallic and the black out-lines finishes the profile of the city bike.

Thus, nothing stands in the way of your tours:

get up - set off!

With the trekkingbike you not only have a powerful, but also

a highly comfortable E-Bike.

With the adjustable handlebar stem you will easily find the optimal seating position.

E-Bike Details

The Bafang engine

The trekkingbike has a powerful, unobtrusively built BAFANG engine. With 250 watts it gives you the necessary boost to conquer mountainous terrain. To support your driving style, you can rely on a 7 gear Tourney circuit from Shimano.

The partially integrated lithium-ion battery is so inconspicuous that you will not think of an E-Bike. The battery is equipped with a charge status indicator and an USB charging socket. The lock with the key secures it against theft.

The LCD display is located on the left side of the handlebar. You can adjust the brightness and control the most important functions.

- speed
- support level of the motor from 1 to 5
- battery status
- total and daily mileage

The **mechanical disc brakes** provide the necessary braking power, even at high speed.

The quick-release system:

If you need a fast disassembly you can easily remove the front wheel through the quick-release system.

The **suspension fork** provides additional comfort. Even large bumps are no obstacle for the spring deflection with 63 mm.

The thumb gas

is something really practical. Comfortably accelerate up to 6 km/h without pedaling. If you have inlaid the wrong gear when stopping, you can easily press the thumb throttle on the right side of the handlebar and get a comfortable traction support.

The tires from KENDA:

Comfort is one of the most important priority for the Trekkingbike. So of course it is also equipped with comfortable tires. The tires from KENDA are equipped with reflective stripes on the sides and offers you the best performance.

The rear light is equipped with reflectors and is located below the luggage rack, so others can still perceive you well in the dark. The sturdy rear luggage rack can be loaded up to 25 kg. Thus, for example, you can easily transport larger purchases safely home.

The LED light can be switched on and off very simply by pressing a button via the control unit on the handlebar.

The synthetic leather saddle by Kmotion is easily adjusted in height by the quick release. The color coordination with the handles supports the sporty look of the E-Bike.

The pedals

by Prowheel are non-slip due to the integrated ribbing and are easily visible at night thanks to the attached reflectors.

The handlebar is ergonomically shaped for perfect posture. Due to the adjustable stem, it can be easily adapted to your needs.

At the front and back are nicely mounted mudguards with water deflectors. They will protect you from unexpected splashes. The Trekkingbike is available in **pearly white**.

Available Variants:

Women Bike

Men Bike

Technical Specifications

Trekkingbike Women / Men

Drive

brand and type:	BAFANG hub engine
power:	250 Watt
engine support:	up to 25 km/h
hand throttle:	about 6 km/h
